Dear Diana and Toni,

You need to know the truth behind your mother’s death. I cared about her and can’t let this happen without saying anything. Your mother complained hours before her death on 2nd shift that she was having chest pains to the aid and the aid reported it to the nurse who was [redacted]. Not only did he not go check on her c/o chest pain he told the staff she just needed to go poop. She begged for someone to call her daughter because no one was listening to her c/o pain and help. She may still be here today if that nurse would have taken her complaint seriously. [redacted] was also aware that she was asking for you and your sister and lied and said Leona had no last words but she did and they were PLEASE CALL MY DAUGHTERS, ONLY THEY CAN HELP!!!!!!!!!!!!!!!!!!!!!!!!!!!! BUT [redacted] DIDN’T CARE AND DIDN’T EVEN CHECK ON HER. The nurse on duty with her death did his best to resuscitate her and is taking this so hard and wasn’t even told that Leona had c/o chest pain on 2nd shift or he would have taken it seriously. Please f/u on this and take action because this is wrong. I am so sorry for your loss but she didn’t deserve to suffer with that pain because of a nurse who is only there for a paycheck. Leona deserves justice. They are going to try to cover this up because [redacted] was natural causes but she could have been saved if only a nurse who cared was on duty instead of [redacted].

From someone who cares.
